

ABOUT ME

After a 3,5 years period in Manufacturing Industry : firstly as a Project Engineer and then in Controlling Department, I have decided to pursue my career into Data Analytics.

After a successful Self Training period in Data Analytics I've joined Stuart a last-mile delivery scale up as an Operations Data Analyst and then as Product Analyst in Network Optimisation.

I'm looking for a Senior Data Analyst Position

WORK EXPERIENCE

STUART  
Paris  
Aug 2022 - Present

- Data Analytics**
  - Product Analyst - Network Optimisation**  
Mar 2024 - Present
    - Collaborated cross-functionally with Engineering, Product Management, and Design teams to develop a reactive software aimed at enhancing platform reliability through financial incentives and courier communications for 3 European markets
    - Conducted Statistical Testing to extract actionable insights, informing and steering product development decisions.
    - Designed and implemented SQL pipelines alongside Tableau dashboards for comprehensive monitoring of critical product performance indicators.
  - Data Analyst - Operations**  
Aug 2022 - Mar 2024
    - Engineered an automated Python solution for managing high-priority requests: GDPR, URSSAF and Government Indicators and streamlining the Courier Digital Onboarding process and saving 20 hours per week for Operations.
    - Engineered an automated Python-based earnings compensation model to assure a minimal hourly earnings for couriers in France
    - Collaborated with Operations to refine financial incentive strategies ~ 60k€ weekly, increasing profitability through data-driven optimizations.
    - Provided pivotal support to the Data Science team in the development and deployment of Machine Learning products into production environments.

CLAAS  
Sep 2018 - Apr 2022

- Manufacturing Industry**
  - International Graduate Program - Finance & Controlling**
